## Minutes from Previous Meeting

In our previous meeting on 4/29, our group's progress faltered slightly due to several exams for its members. Robin and I (Freddy) had made menial changes to the code since the precious meeting> Tyler did manage to get the Canvas importing to be very close to complete, and also managed to effectively write test functions for our vonage API. We discussed that our goal for our product's status by Sunday, and planned a pseudo schedule for the weekend regarding when we'd meet and a timeline for our tasks. This weekend would be the last before our due date, so we also wanted to stress an in person meeting on Sunday to finalize our third API and make final major debug fixes.
