- Implemented (some) local storage tool functions
- Planned sorting implementation w/ local storage

Tasks Completed:

	Task Description	Assigned to	Status
1e	As a user in the home UI, I am able to organize my assignments by a set priority.	Robin	WIP
NEW	Implement local saving for adding assignments	Tyler	WIP
NEW	Implement local saving for adding courses	Freddy	WIP

Before The Next Meeting (Next Sprint)

Plans:

- Finish onloading from local storage
- Finish sorting assignments from local storage

Task Assignments:

	Task Description	Assigned to
1e	As a user in the home UI, I am able to organize my assignments by a set priority.	Robin
NEW	Implement local saving for adding assignments	Freddy
NEW	Implement local saving for adding courses	Freddy
NEW	Populate page from local storage	Tyler

Minutes from Previous Meeting

In our 4/6 meeting we quickly discussed what was accomplished at the end of this sprint and what we will work on for our next sprint. We had discovered that performing the sort would become much easier and efficient if we first worked on saving our assignments and with that moved it to the next sprint. Adding and adjusting due dates has been partially completed but can also only be made useful once we can save our assignments to an object on local storage. From this we decided to start working on storage for the time being while leaving the current work as is for the sprints submission. We divided up the general roles of the next sprint at the end of the meeting.
