Before The Next Meeting

Plans:
- We can retrieve a classlist from canvas
- Populate import UI
- Selectively import classes
- Remove assignments

Task Assignments:

Task Description	Assigned to
As a user, I can remove a class	Tyler
As a user in the import UI, I will be prompted for the name of the course.	Robin
As a user in the import UI, I can provide login information for canvas.	Tyler
As a user in the import UI, I can import course information from canvas.	Tyler
As a user in the import UI, I can save the imported canvas course information.	Tyler
As a user in the import UI, I can remove previously imported courses.	Robin
As a user in the quick view, I should be able to view all assignments.	Freddy

Minutes from Previous Meeting

In our 4/14 meeting our main focus was on addressing the assignment and course data importing. Our project largely stalled because of issues with our API choices and we set the goal of being able to access the API data by Sunday evening. Tyler would begin looking at the Canvas API, I (Freddy) would start looking at the Google Classroom API, and Robin would continue with developing the frontend for our new pages. Tyler would also begin testing notification APIs that we could potentially use as well as finish up the implementation of remove.
